# COMPANY VALUES

## Vision

We aspire to become a trusted partner for fashion brands and retailers worldwide, empowering them to deliver stylish and sustainable apparel to their customers.

## Mission

Ascend to the pinnacle of Bangladesh's garment export industry, establishing a benchmark for excellence and pioneering practices.. We are committed to fostering a diverse and ethical work environment that empowers 2,000 individuals in Bangladesh to thrive professionally and personally.

# MESSAGE

## **Hazi MD Osman Sikder**, Chairman

We are not only proud of our rich heritage but also deeply committed to ethical and sustainable practices. We believe in the power of fashion to inspire, empower, and connect individuals across borders, while minimizing our environmental impact. We are committed to fostering a diverse and inclusive work environment that attracts and retains the brightest minds in the industry. We embraced circular fashion and believe that fashion can be a force for good, and we are committed to it

## **MD Jewel Hossain**, Managing Director

Guided by a steadfast dedication to excellence, sustainability, and ethical practice, we are committed to creating a diverse and empowering work environment that nurtures the talents of our people, enabling us to deliver exceptional products and services to our customers worldwide. As we navigate the ever-changing fashion industry, we remain committed to our mission to become a global leader in garment manufacturing, leaving a positive impact on the communities we serve.

## **Tamanna Akter**, Director

Jewel Design Limited is committed to sound financial management and sustainable growth. We are focused on maximizing shareholder value while maintaining a robust financial position that supports our long-term goals. We believe in the power of strategic partnerships and investments to fuel our expansion plans and strengthen our competitive edge. Our financial strategy is aligned with our commitment to ethical and sustainable practices, ensuring that our growth positively impacts the communities we serve.

## **Tanzila Akter**, Director

Our journey, spanning over a decade, is a testament to the power of determination, the fuel of passion, and the unwavering belief in the transformative potential of fashion. From our humble beginnings as a buying house to our current position as a leading garment manufacturer, we have consistently pushed the boundaries. Our success is not merely a measure of our market share or financial growth; it is the culmination of countless individual efforts, the collective spirit of our team.

# COMPANY HISTORY

## 2026: Establishing an End-to-End Manufacturing Platform

Demonstrating its commitment to efficiency and on time delivery, Jewel Design Limited is currently developing a 2 lac sqf 6-floor multi-express building, which will serve as the office of the group of companies and house an end-to-end manufacturing platform for RMG. This ambitious project is expected to be completed by 2026 and will further enhance the company's capabilities and position it as a leader in the garment industry.

## 2012 : Securing the First Major Client

The year 2012 also witnessed a breakthrough for Jewel Design Limited, as it secured its first major client, YMIC from Canada. This successful partnership solidified the company's position in the industry and paved the way for future collaborations.

## 2017 : Partnership with XIOS, USA

Jewel Design Limited's growth trajectory continues with the acquisition of their second major client, XIOS from the USA. This partnership further strengthens the company's position in the industry and demonstrates its ability to attract and retain high-profile clientele.

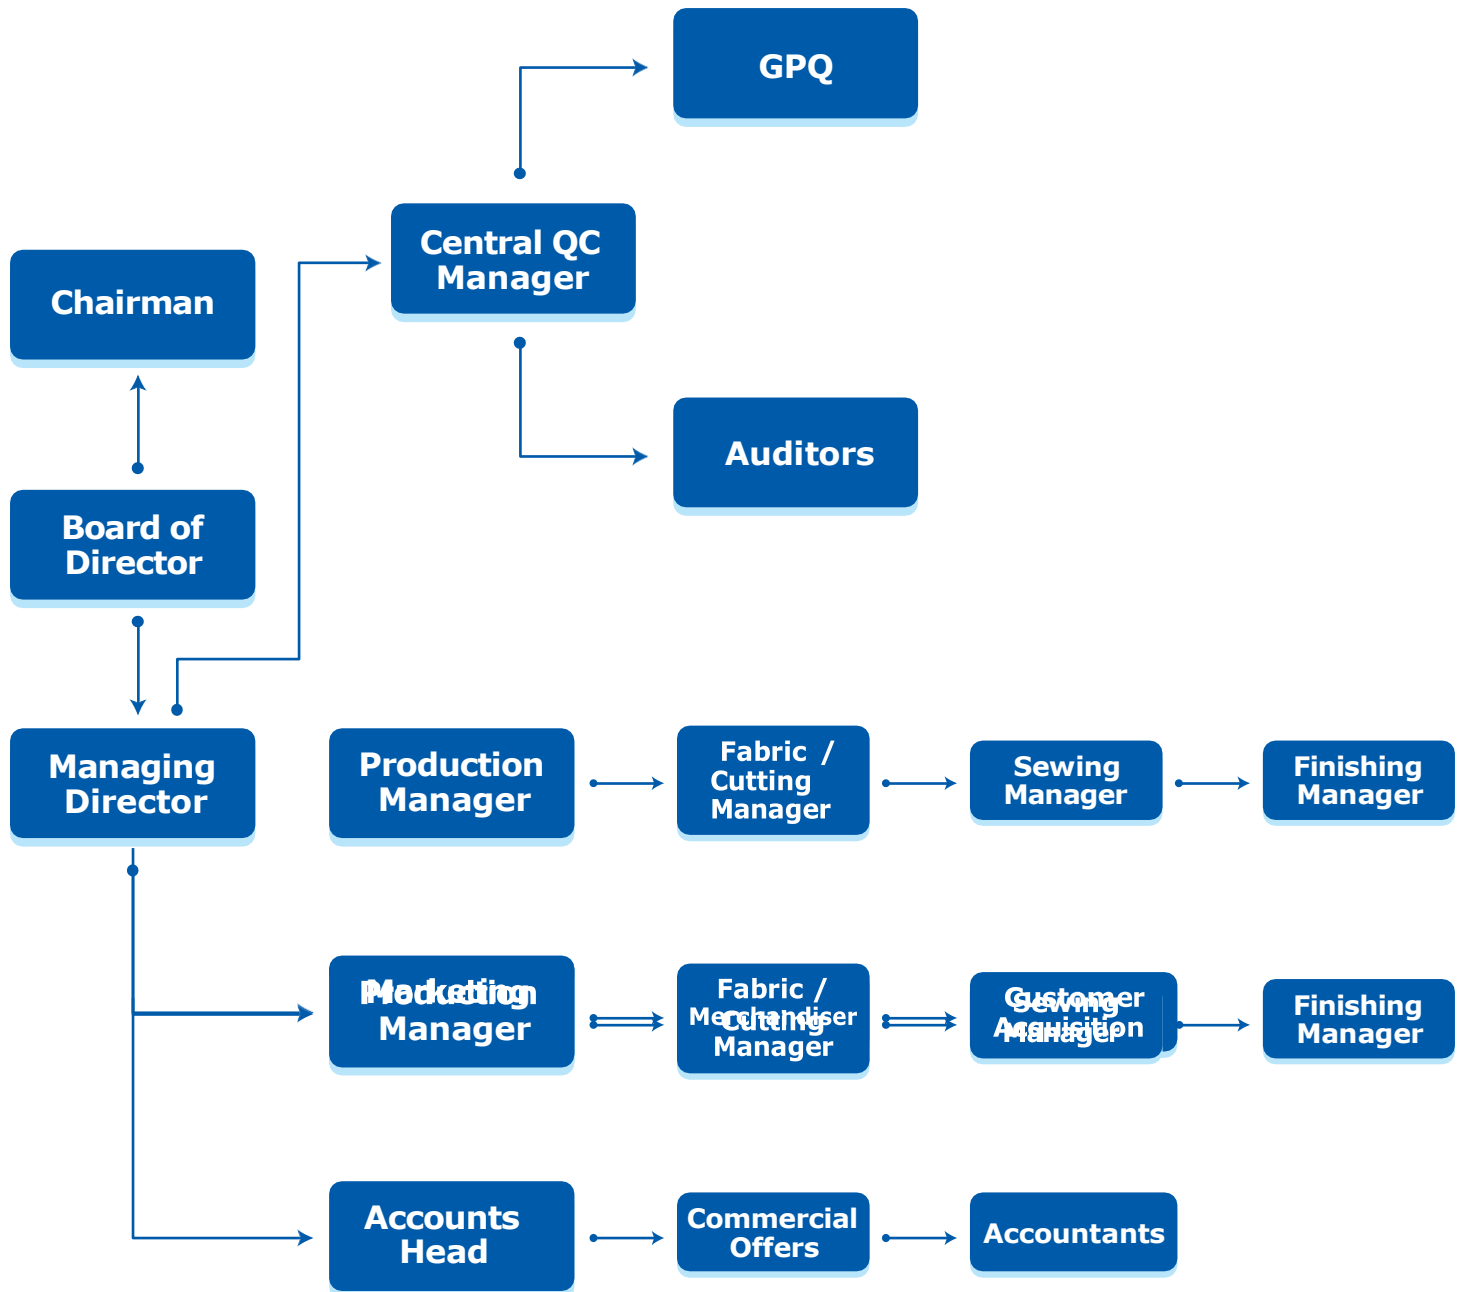

## 2011 : EXPANSION INTO MANUFACTURING

In a significant milestone, Jewel Design Limited expanded its operations to include a manufacturing unit in 2012. This strategic decision marked a pivotal moment in the company's growth trajectory, enabling it to oversee the entire garment production process from inception to completion

## 2004 : THE FOUNDING

Jewel Design Limited was established in 2004 as a buying house, marking its entry into the garment industry. With a clear vision and unwavering commitment, the company embarked on a journey to establish itself as a prominent player in the ever-evolving fashion landscape.

# ORGANOGRAM

# PRODUCT MANUFACTURED

**Jewel Design Limited manufactures a wide range of denim and woven garments for men and women. The company's products include:**

# MEN'S CHINO

Men's chinos are a type of smart-casual trouser made from cotton twill with a small amount of elastane for extra stretch. Unlike suit pants, they do not have a pleat down the front and usually have jetted back pockets. Chinos are versatile pants that can be worn in a variety of settings. While chinos can be dressed up, it's essential to note that they are not suitable for strictly formal events like black-tie occasions, where a suit or tuxedo is expected.

Chinos are typically constructed of light-weight twill or stretch cotton for breathability and freedom of movement. They are more practical than suit pants, which are typically made of fine new wool and have a lining up to the knee for comfort. Market segments who value comfort would be biased to wear chinos even over jeans.

If your brand is targeting casual and semi-casual dressers, then manufacturing with us will ensure that your customers receive outstanding quality of workmanship. We use only the finest materials and construction techniques to create clothing that is both stylish and durable. Our garments are designed to last, and our customers can be confident that they are getting a quality product that will make them look their best.

# CARGO PANTS

Cargo pants are a type of casual pants that are typically made of cotton or cotton-polyester blend. They are characterized by their large cargo pockets, which are often used to carry tools or other items. Cargo pants are often worn for outdoor activities or for work in the military or construction.

Cargo pants are a versatile piece of clothing that can be dressed up or down. They can be worn with a t-shirt and sneakers for a casual look, or with a button-down shirt and blazer for a more formal look. Cargo pants are also a popular choice for travel, as they are comfortable and can be easily packed.

In the late '90s, cargo trousers were all the rage. Throughout this time, they crossed over from being considered military or labor to being considered fashionable. Many people, especially those interested in urban and streetwear fashion, appreciated its loose cut and numerous pockets. Cargo pants have been making a major comeback on the streets from fall 2023 and onward. If your brand is targeting people looking for fashionable and comfortable streetwear, we are here to help.

# MEN'S JOGGER

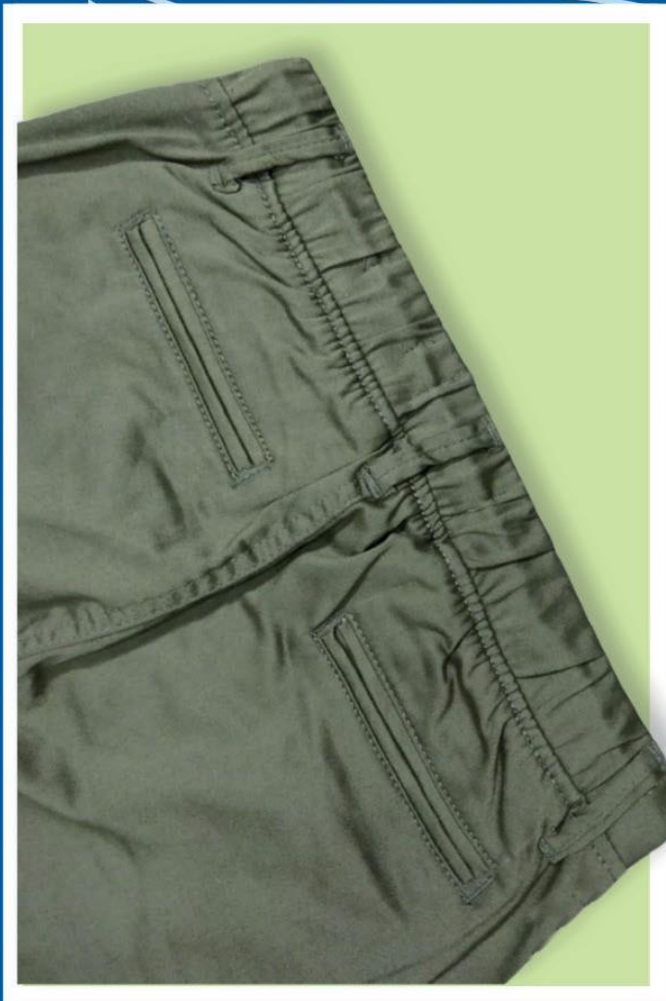

Men's joggers have evolved into a popular choice for modern, casual wear, blending style and comfort effortlessly. Crafted typically from soft, stretchy fabrics like cotton blends or fleece, joggers are designed with an elasticated waistband and cuffs, offering a relaxed fit with a tapered leg. Joggers have become a go-to option for those seeking versatile attire suitable for a range of activities, from leisurely strolls to light workouts.

The material used in joggers varies, but commonly includes blends that offer breathability and durability, ensuring lasting comfort for wearers throughout their daily activities. This comfort factor often appeals to market segments inclined towards athleisure or individuals seeking a balance between relaxation and style, making joggers a preferred choice over more rigid or less flexible trousers.

For brands targeting a demographic leaning towards relaxed, athletically-inspired fashion, partnering with us in the manufacturing process guarantees exceptional quality. We pride ourselves on utilizing premium materials and employing cutting-edge construction methods to produce joggers that strike the perfect balance between style, comfort, and durability.

# PRODUCTION CAPACITY

**Jewel Design Limited is a leading manufacturer of woven bottoms, with a monthly production capacity of 120,000 pieces and a daily capacity of 6,500 pieces. The company's greatest strength is its focus on bottoms, which makes it a specialist factory in this category. Jewel Design Limited has a state-of-the-art production facility with the latest equipment and machinery, and it is also committed to sustainable manufacturing practices.**

Jewel Design Limited's focus on bottoms allows it to specialize in the production of this type of garment. This specialization gives the company a number of advantages, including:

**Deeper expertise:** We have a deep understanding of the specific needs of bottom garment production. This expertise allows the company to produce high-quality bottoms that meet the needs of its customers.

**Efficiency:** Our specialization allows it to streamline its production process and achieve greater efficiency. This efficiency translates into lower costs for the company and its customers.

**Design Iteration:** We are able to iterate through various designs more quickly than a company that produces a wider range of garments. This is because the company has a dedicated team of experts focused on bottom garment production.

The Company's state-of-the-art production facility gives the company a number of advantages, including:

**Accuracy:** The company's equipment is highly accurate, which allows it to produce bottoms with consistent quality.

**Speed:** The company's equipment is also highly efficient, which allows it to produce

bottoms quickly and cost-effectively.

**Flexibility:** The company's facility is flexible enough to accommodate changes in demand and production requirements.

# PRINTING

done in-house

Our focus on bottoms, state-of-the-art production facility, and commitment to sustainable manufacturing practices make it a leader in the woven bottoms industry. The company is well-positioned to meet the needs of its customers for high-quality and affordable bottoms.

# INTO THE FUTURE

We are looking to increase floor space and production capacity by new infrastructure which will be constructed on the Dhaka-Mawa Highway. With a total area of 2,00,000 sq.ft this will be part of the Jewel Design group of industries related to garments manufacturing. This will significantly increase production of a Company who are already experts in bottoms manufacturing.

For the current set-up there is enough machinery and the company is looking to increase machinery with fresh investment for the new facility which will be imported from China. The required transition will be carried out by the Management team with the help of its experienced team of Managers and line managers..With 315 employees Jewel design boasts a team of line managers and workers with an average career span of 10 years. This competent team will also take part in the hiring process further strengthening the Company to its core.

**"On average all  
our employees  
have been  
working with  
us for 10 years"**
